Education

SETU Carlow – Bachelor of Science (Honours) in Software Development

2021 – 2025

Year 1 GPA – **First Class Honours (1.1)**
Year 2 GPA – **First Class Honours (1.1)**

Year 3 GPA – **Second Class Honours (2.1)**
Year 4 GPA – **First Class Honours (1.1)**

Secondary School – CBS New Ross Leaving Certificate 2015

2009 – 2015

Subject	Level	Grade
English	Ordinary	A2
Mathematics	Higher	C1
Design & Communication Graphics	Higher	A1
Physics	Higher	C2
History	Ordinary	C2
Lithuanian	Higher	C3
History	Ordinary	B3

Achievements

- Awarded best final year project of class 2025 in Software Development. Project name SiteSafeAI.
- Finalist of Sun Life Academic Awards with my final year project SiteSafeAI.

Technologies

Languages: JavaScript, C#, HTML, CSS, Python, Java, C++, SQL, R, GraphQL.
Frameworks: .NET, .NET Core, React, jQuery, Bootstrap, Flask, OpenCV, PyTorch, TensorFlow.
Tools: Git, Terminal, Postman, GitHub, npm, MySQL, Excel, PowerPoint.
Platforms: Ubuntu, Azure, Windows, Visual Studio, VS Code, IntelliJ IDEA.
Soft Skills: Problem-solving, teamwork, eagerness to learn, attention to detail.

Professional Experience

Victor Treacy International – Freight Booking (Software Developer)

May 2025 – Current

- Responsible for updating and expanding website functionality to meet evolving requirements, covering frontend, backend, and database development in line with changing business and regulatory needs.
- Performed coding, debugging, integration testing, and implemented AJAX for dynamic data handling. Collaborated closely with senior developers to ensure high-quality deliverables.
- Utilised .NET, C#, Bootstrap, jQuery, JavaScript, HTML, CSS, SQL, with version control managed through HgTortoise.

Netwatch – Security Monitoring (Software Development Intern)

Jan 2024 – July 2024

- Contributed to the development of software solutions across web pages, mobile apps (Android and iOS), and in-house applications within a Scrum framework.
- Performed coding, debugging, and testing applications, collaborating closely with senior developers.
- Gained extensive knowledge in areas such as- Azure DevOps, Git, Visual Studio, Visual Studio Code, React, Typescript, C#, Team Coding, GraphQL, SQL, Packages, Libraries, Versions, Test Cases, Mobile Applications.
- Implemented new features and resolved bugs and defects in existing software, improving user experience.
- Participated in team meetings like Sprint Planning, Daily Stand Up, Weekly Stand Up, Planning Poker, Peer Reviews, Team Days Out.

- Worked collaboratively in teams of 6-9 people to manufacture life-saving medical equipment in a clean room environment.
- Followed strict SOPs to ensure safety, compliance, and product quality at every stage of production.
- Maintained high standards of cleanliness and precision within a controlled environment to protect product integrity.
- Recognised with awards for outstanding attendance and reliability.

Projects

SiteSafeAI – Final Year Main Project

2025

(Winner of best project for Software Development & Finalist in Sun Life Academic Awards)

- Developed an AI-powered web application to enhance safety compliance on construction sites by detecting hazards in real time using computer vision.
- Implemented a full-stack solution with a Python-based backend, machine learning models, and a React frontend for intuitive monitoring and alerts.
- Integrated a MySQL database to store incident reports, user data, and hazard detection logs securely.
- Conducted extensive testing and received high praise for innovation, technical execution, and practical impact.

GitHub Link: <https://github.com/C00276177Tomas/SafeSiteAI>

R Flexdashboard – Data Visualisation

2025

- Created an interactive dashboard using Flexdashboard in R to visualise detection data for the SiteSafeAI project.
- Displayed key metrics, charts, and time-series trends to monitor and analyse safety-related events.
- Integrated dynamic visual components using ggplot2 and plotly, enabling stakeholders to easily interpret patterns in site activity and detections.

Deployed Webpage Link: <https://rpubs.com/GloreasBoreas/SiteSafe>

Swimmer Performance Tracker – Cloud Development

2023

- Developed a web-based application to track swimmer performance using Python and a cloud-hosted MySQL database on PythonAnywhere.
- Designed a dynamic interface to visualise swim times and event types, enabling swimmers and coaches to monitor progress over time.
- Implemented charting features to plot performance trends, highlighting strengths and areas for improvement.
